KNITTED ELASTIC COMPRESSION BANDAGE

- ◆ Clinically proven patient comfort
- ◆ Patented knit matrix offers precise, consistent and controlled compression
- ◆ High cotton content provides complete patient comfort and enhanced therapeutic performance
- ◆ Unique elastomers designed for exceptional compression and durability
- ◆ Innovative synthetic fiber construction delivers the best breathability while transferring moisture away from the patient's skin
- ◆ Greater durability than other economy compression bandaging yet cost effective per procedure
- ◆ Available in sterile and non-sterile packaging
- ◆ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

The Avcor X-Econ™ Knit Elastic Compression Bandage consists of a unique knit construction of highly absorbent and durable cotton and synthetic yarns. The precise engineering of the elastomers and knit configuration afford maximum compression in each bandage. The open, knitted design enhances breathability while providing maximum support, compression and patient comfort.

honeycomb

KNITTED ELASTIC COMPRESSION BANDAGE

- ◆ Patented self-closure which eliminates sharp metal clips and hooks provides user safety and ease of application
- ◆ Patented Honeycomb® knit matrix enhances breathability while delivering controlled support and ideal compression
- ◆ Uses 100% cotton yarns for durability and absorbency
- ◆ Less abrasive as 80% of cotton fiber is applied against patient skin during recommended applications
- ◆ Superior elastomers provide 210% knit controlled stretch for exceptional compression and durability
- ◆ Scalloped knit edges eliminate roll and venous tourniquet effect
- ◆ X-rays may be taken directly through the Honeycomb®
- ◆ Available in a variety of colors
- ◆ Universally color coded sizing
- ◆ Available in environmentally friendly sterile and non-sterile packaging
- ◆ Patented design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Honeycomb® Elastic Bandages

Honeycomb® Elastic Bandages possess the two most requested features in elastic bandages – a self-closure that replaces clips and a distinctive knit construction that provides comfortable, controlled compression. You will find these state-of-the-art bandages easy to apply, conveniently packaged, reusable and available in a variety of sizes and colors.

Honeycomb® Double-Length Elastic Bandages

Double your therapeutic pleasure with the comfort and security of double-length bandages. All the same features of Honeycomb® Elastic Bandages with more than twice the length.

Honeycomb® Beach Bandages

If injury prescribes an elastic bandage or compression dressing, why not have "A Day at the Beach" with Honeycomb® Beach Bandages. All the state-of-the-art features of the Honeycomb® patented self-closure bandages are wrapped up in a pleasing array of beach colors that are as effective in appearance as in therapeutic performance.

Latex-Free

honeycomb

LATEX-FREE KNITTED ELASTIC COMPRESSION BANDAGE

- ◆ Exclusive latex-free elastomers provide safety for latex sensitive patients and professional health care personnel
- ◆ Less abrasive as 80% of cotton fiber is applied against patient's skin during recommended applications
- ◆ Patented self-closure which eliminates sharp metal clips and hooks provide a safer and easy to handle bandage
- ◆ Patented Honeycomb® knit matrix enhances breathability while delivering comfortable, controlled compression
- ◆ Center gold-colored stripe and teal end-stitching identifies each bandage as latex-free for patient safety
- ◆ Distinctive gold, knitted-in directional indicator for ease of application
- ◆ Scalloped knit edges prevent roll and eliminate venous tourniquet effect
- ◆ X-rays may be taken directly through the Latex-Free Honeycomb® Elastic Bandage
- ◆ Superior elastomers provide 210% knit controlled stretch for exceptional compression and durability
- ◆ Packaged environmentally friendly in both sterile and non-sterile put ups
- ◆ Patented design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Avcor developed and manufactures the Latex-Free Honeycomb® Elastic Bandage with the purpose of providing the health care giver an elastic compression bandage that can be handled safely, easily and tolerated by latex sensitive patients. Avcor's new Latex-Free Honeycomb® now offers the three most requested features in elastic bandages: a self-closure which replaces clips; distinctive knit construction that provides comfortable controlled compression and NO latex. Each bandage has a distinctive color-coded, knitted-in directional indicator that identifies the bandage as latex-free. The indicator also provides an alignment reference for the preferred 50% over wrap used in most procedures. These state-of-the-art bandages are easy to apply, conveniently packaged, and are available sterile and non-sterile in a non-glare beige color.

adban

COHESIVE COMPRESSION BANDAGE

- ◆ Latex-free cohesive will not irritate latex sensitive skin and is safe for all uses
- ◆ Textured surface enhances cohesive action for more uniform application and security
- ◆ Self-adherent closure is easier to apply and reapply securely saving valuable nursing time
- ◆ Non-woven web material is less abrasive to patient's skin
- ◆ Cohesive technology eliminates hardening or "caking up" and will not impair circulation or require cutting to remove it from the patient
- ◆ Slightly tacky feel eliminates slipping or loosening
- ◆ Exclusive fabric provides breathability and patient comfort
- ◆ Water repellency keeps the patient dry and promotes healing
- ◆ Consistent 140% elongation maintains even compression
- ◆ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Adban™ Cohesive Compression Bandages are a new, latex-free, self-adherent compression bandage. Unlike most self-adherent bandages, Adban™ remains flexible, will not loosen, slip or cast up during use and will deliver even, consistent compression. Adban™ is water repellent so it stays dry and because of its higher, more breathable loft provides better patient comfort and protection. The distinctive latex-free nature of the cohesive eliminates the worry of hypersensitivity reactions to latex and may be handled easily and safely by nursing personnel. Adban™ is available in sterile and non-sterile packaging in non-glare beige and Avcor action colors.

ECONOMY COHESIVE BANDAGE

- ⌋ Latex-free cohesive will not irritate latex sensitive skin and is safe for all uses
- ⌋ Textured surface enhances cohesive action for more uniform application and security
- ⌋ Self-adherent closure is easier to apply and reapply securely saving valuable nursing time
- ⌋ Non-woven web material is less abrasive to patient's skin
- ⌋ Consistent elongation maintains through percentage stretch
- ⌋ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings
- ⌋ Value priced alternative to provide an economic solution with a quality bandage
- ⌋ Won't slip or loosen on bed ridden patients

e-ban® Economy Cohesive Bandages are a new, latex free self-adherent bandage. e-ban® is excellent for retaining dressings, protecting wounds, immobilizing injuries and securing devices to patients. As a self-adherent wrap e-ban® sticks only to itself. e-ban® also provides consistent compression to help minimize injured areas. The distinctive latex free nature of the cohesive eliminates the worry of hypersensitivity reactions to latex and may be handled easily and safely by nursing personnel. e-ban® is available in five widths for a variety of applications.

all-in-one

LATEX-FREE I.V. ARM SUPPORT SYSTEM

- ◆ Latex-free stretch bond laminate support and strap fabrics provide ultimate protection for latex sensitive patients
- ◆ Totally self-contained system allows for easier, less time-consuming and more cost effective application
- ◆ The extruded support adds maximum hand, wrist and arm support for patient safety and comfort
- ◆ A multi-layer moisture barrier system keeps patients dry and prevents skin break down
- ◆ Unique fastening system eliminates re-taping and provides easy access for inspection of the site
- ◆ The All-in-One™ provides an effective secure system of avoiding infiltration while maintaining the I.V. site
- ◆ Available in a full range of sizes which can be custom fit
- ◆ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Ease, convenience and comfort in one self-contained armboard: The latex-free All-in-One™ I.V. Arm Support System cuts costly minutes from stabilizing an I.V. site and is easily applied by one person. Once the I.V. is in place, the All-in-One™ is ready to be stabilized with a unique fastening system that eliminates the need for costly bandaging and taping. The padded splint absorbs and wicks blood and fluids lost during I.V. insertion, keeping the patient dry for long lasting comfort. The self-contained latex-free All-in-One™ I.V. Support System comes in five ready-to-use sizes: neonatal, infant, pediatric, adult wrist and adult arm.

X-mark

LATEX-FREE ESMARK BANDAGE

- ◆ Latex-free X-Mark™ contains no rubber proteins, resins or fatty acids providing maximum protection for latex sensitive patients and nurses
- ◆ The specially formulated elastomeric compound requires no talc, eliminating air borne particles, simplifying application techniques
- ◆ Unique synthetic material eliminates curling and roll up
- ◆ Consistent 400% elongation for ideal compression and application
- ◆ Supple and smooth, the X-Mark™ is less abrasive than latex, thereby delivering maximum patient comfort and protection
- ◆ X-Mark™'s polyisoprene material will not block or tack, and lies flat for ease of application
- ◆ All packaging for the sterile bandage is latex-free, including the security band
- ◆ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

X-Mark™ is an exclusive latex-free esmark style bandage used to deliver maximum and consistent pressure to the extremities for exsanguination prior to surgery. Talc-free, its silicone base properties afford optimum use in the O.R. environment. The X-Mark™ Latex-Free Esmark Bandage consists of an innovative and unique latex-free polyisoprene compound. This unique compound is less abrasive and provides maximum protection to the patient and health care professional by eliminating all natural rubber proteins and fatty acids associated with latex esmark bandages.

X-tourn

LATEX-FREE TOURNIQUET STRAP

- ◆ Latex-free X-Tourn™ contains no latex rubber proteins, resins or fatty acids providing ultimate patient safety and protection
- ◆ The supple and smooth latex-free X-Tourn™ is far less abrasive to the patient's skin and delivers maximum performance and comfort
- ◆ X-Tourn™'s polyisoprene material is uniform in thickness eliminating thin spots which could shred or break during application
- ◆ The X-Tourn™ does not curl or rope for ease of application and comfort
- ◆ X-Tourn™'s talc-free synthetic material is easy to tie and remove without excess clean up
- ◆ X-Tourn™ is available in three convenient sizes: adult 1" x 18", adult 3/4" x 18" and pediatric 3/4" x 12"
- ◆ Unique design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Avcor created the X-Tourn™ Latex-Free Tourniquet Strap with patient safety in mind. The exclusive latex-free compound contains no latex rubber proteins, resins or fatty acids that produce hypersensitive reactions in patients and professional health care personnel. The X-Tourn™ can be used with confidence and handled safely, easily and tolerated by your latex sensitive patients and hospital staff each time a procedure requires the use of a disposable tourniquet. X-Tourn™'s identifying off-white appearance sets it apart from other tourniquets containing latex and harsh dyes. It is available in three convenient sizes.

LATEX-FREE KNITTED ELASTIC COMPRESSION BANDAGE

- ◆ Exclusive latex-free elastomers provide safety for latex sensitive patients and professional health care personnel
- ◆ Less abrasive as 80% of cotton fiber is applied against patient's skin during recommended applications
- ◆ Patented self-closure which eliminates sharp metal clips and hooks provide a safer and easy to handle bandage
- ◆ Patented X-TEN™ knit matrix enhances breathability while delivering comfortable, controlled compression
- ◆ Center gold-colored stripe and teal end-stitching identifies each bandage as latex-free for patient safety
- ◆ Distinctive gold, knitted-in directional indicator for ease of application
- ◆ Scalloped knit edges prevent roll and eliminate venous tourniquet effect
- ◆ X-rays may be taken directly through the Latex-Free X-TEN™ Elastic Bandage
- ◆ Superior elastomers provide 210% knit controlled stretch for exceptional compression and durability
- ◆ Packaged environmentally friendly in both sterile and non-sterile put ups
- ◆ Patented design features highest quality materials and innovative manufacturing techniques that provide reduction in units used and affect overall cost savings

Avcor developed and manufactures the Latex-Free X-TEN™ Elastic Bandage with the purpose of providing the health care giver an elastic compression bandage that can be handled safely, easily and tolerated by latex sensitive patients. Avcor's new Latex-Free X-TEN™ now offers the three most requested features in elastic bandages: a self-closure which replaces clips; distinctive knit construction that provides comfortable, controlled compression and NO latex. Each bandage has a distinctive color-coded, knitted-in directional indicator that identifies the bandage as latex-free. The indicator also provides an alignment reference for the preferred 50% over wrap used in most procedures. These state-of-the-art bandages are easy to apply, conveniently packaged and are available sterile and non-sterile in a non-glare beige color.
